

KühlTM
BLDC Fans

Enhance Home Décor
with
Beautiful Fans

Saving electrical energy is more critical than ever as rising consumption accelerates global warming. Thus it is our responsibility to conserve energy and ensure a sustainable future.

Conventional induction ceiling fans consume around 80W of power. With over 100 crore fans in use across the country, this results in massive energy wastage.

Kühl BLDC Fans consume just 28W, delivering up to 65% energy savings with higher airflow and lowest possible noise. Thus, savings pay back the investment within 18–24 months.

What's more, Kühl BLDC Fans are high on Style and Design. This wide range of Beautiful Fans helps in Enhancing Home Decor to give you best of both worlds, High on Design and Saving on Electricity.

So it's time to select Kühl BLDC Fans and be part of the change toward a sustainable future.

**All fans have BEE 5-Star rating
(where-ever standards exist)**
